What is the Sanitation Systems Perspective?

It is an interactive version of eawag's Compendium of Sanitation Systems and Technologies, a compilation of appropriate sanitation technologies, plus a tool for combining technologies in a full system.

The Perspective's popularity is its brevity - ordering and structuring a huge range of information on **tried and tested technologies (https://sswm.info/sanitation-systems/sanitation-technologies)**. As in the first edition we present only proven **technologies (https://sswm.info/sanitation-systems/sanitation-technologies)** that are appropriate for low- and middle-income settings. Also, we include only "improved" sanitation **technologies (https://sswm.info/sanitation-systems/sanitation-technologies)**, featuring safe, hygienic, and accessible sanitation. In this eCompendium Perspective we present the whole range of urban, peri-urban and rural **technologies (https://sswm.info/sanitation-systems/sanitation-technologies)** (e.g. from simple pits to conventional sewers).

The Compendium is also available in **French (http://www.eawag.ch/fileadmin/Domain1/Abteilungen/sandec/schwerpunkte/sesp/CLUES/Compendium_French/compendium_fr_2016.pdf)**, **Spanish (http://www.eawag.ch/fileadmin/Domain1/Abteilungen/sandec/schwerpunkte/sesp/CLUES/Compendium_Spanish_pdfs/compendio_sp.pdf)**, **Vietnamese (http://www.eawag.ch/fileadmin/Domain1/Abteilungen/sandec/schwerpunkte/sesp/CLUES/Compendium_2nd_pdfs/Compendium_Vietnamese.pdf)** and **Nepalese (http://www.eawag.ch**

/fileadmin/Domain1/Abteilungen/sandec/schwerpunkte/sesp/CLUES/Compendium_Nepali_pdfs /Compendium_Nepali_final.pdf) – check the **Eawag-Sandec page (http://www.sandec.ch/compendium)** regularly for the publication of the Russian and Arabic editions!

Who is the target audience?

Engineers, planners, decision-makers, NGO staff and students concerned with sanitation in low and middle income countries.

What is the purpose?

A digital platform that offers easily accessible information and facilitates decision-making on sanitation systems and technologies.
